

THE PROBLEM

Campus scheduling tools are built for managers — not students

F-1 international students are legally capped at 20 hours of work per week. On top of that, college schedules shift every semester: new classes, periodic exams, club commitments, and unexpected emergencies mean no two weeks look the same. No existing tool uses AI to understand a student's real availability — they just show a blank calendar.

STUDENT APP VIEW

One screen for everything

Classes, clubs, and work shifts — ranked by priority — in one place. Managers see real availability, not just time slots.

THE AI ALGORITHM

AI-powered, Uber-inspired shift coverage

Just like Uber uses AI to match riders with drivers, SyncShift's AI matching algorithm analyzes availability, ranked priorities, and hour compliance in real time — no manager phone calls required.
